

TECHNICAL INFORMATION BULLETIN

FireClass FC500 (FC501, FC503 and FC506) Console version 01.02.01

1 General Note

This TIB refers to the:

FireClass FC500 (FC501, FC503 and FC506) Console version 01.02.01 which was tested on Microsoft Windows 7/8.1/10 operating system. This release will be available for all applicable markets.

The main contents of this release are:

- Support for FC501 panel
- Support for 128 software zones for FC503 and 256 software zones for FC506

This package contains Firmware bin files for:

- FC501 Panel of version 01.14.02
- FC 503 panel and FC 506 panel of version 01.02.01

There is no automatic upgrade path between different panels. If the panel type is to be changed the configuration for the new panel will have to be started as a new project.

2 Compatibility

FireClass FC500 (FC501, FC503 and FC506) Console version 01.02.01 is Compatible with:

- FC501, FC503 and FC506 panels
